ASGARD SMSF PRODUCT BOOSTED BY SMARTSUPER AGREEMENT

Asgard Wealth Solutions announced today an agreement with *smartsuper* to deliver an enhanced self managed super fund (SMSF) administration service for its clients.

This agreement means that Asgard will provide a broader administration service, delivering to trustees, members and advisers a simple, timely and effective SMSF product.

Also, by selecting a specialist SMSF operator, Asgard will provide it's adviser network and their clients access to industry leading administration and technology.

smartsuper CEO Andrew Bloore said "Some of the most difficult issues for SMSF trustees, members and advisers are how to have a clear and timely view of required tasks and monitoring the current status of the fund's assets and investment strategy."

"Asgard can now build on its existing straightforward SMSF service with this enhanced service and provide useful and timely information plus efficient administration, thus allowing trustees, members and advisers to focus on strategies and investment selection."

Dean Thomas, Asgard's General Manager Product said "This agreement with *smartsuper* improves both the immediate and long-term investor experience and builds on our recent property gearing solution for SMSFs and a series of other key partnerships with specialist providers."
